

The figure is a scatter plot with three regression lines. The x-axis is labeled 'date' and has major ticks for Jul 2025, Oct 2025, Jan 2026, and Apr 2026. The y-axis is unlabeled. The data points are colored green, yellow, and pink. There are three lines: a blue line with a negative slope, a red line with a positive slope, and a black horizontal line. The blue line starts at approximately (Jul 2025, 11.3) and ends at (Apr 2026, 10.1). The red line starts at approximately (Jul 2025, 10.2) and ends at (Apr 2026, 11.1). The black line is horizontal at y ≈ 11.9.
